## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 48 and 59 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Both claims 48 and 59 are dependent claims which depend from canceled independent claims. Therefore, these claims are incomplete. It should also be mentioned that if claim 48 is not canceled from the instant application a restriction requirement will be forthcoming.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Art Unit: 2812

Claims 42-43 are rejected under 35 U.S.C. 102(a, b or e) as being clearly anticipated by Admitted prior art.

Admitted prior art shows the invention as claimed including a titanium silicide layer (see page 2 of specification, lines 5-6) on the supporting substrate in the contact hole of high aspect ratio (see paragraph bridging pages 2-3); an aluminum plug fill and a metal line comprising aluminum formed over the aluminum plug fill (see page 1, lines 15-24). While the Admitted prior art fails to show forming the aluminum layer as-deposited without voids, the specification states that reflow processes can be used to remove the voids but states some disadvantages (see page 3, lines 4-11). However, the claim is still anticipated because the product of this process will not contain voids and, furthermore, for anticipation it does not matter whether an embodiment is preferred or non-preferred. Therefore, the admitted prior art anticipates the product as claimed.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard A. Booth whose telephone number is 308-3446. The examiner can normally be reached on Monday-Thursday from 7:30-6:00.
